📍 Seattle, WA

## WORK EXPERIENCE

---

### Associate Front End Developer

#### Expedia Group

📅 2022 - current

📍 Seattle, WA

- Managed Visual Studio Code to debug and optimize front-end code, achieving a 17% rise in overall application speed as per tests.
- Leveraged Yarn's caching mechanisms to developing build performance, **decreasing average build time from 24 minutes to 18 minutes**.
- Enhanced website security using Joomla-specific extensions, detecting and addressing 21% of unauthorized access attempts before escalation.
- Implemented error handling and logging mechanisms for GraphQL operations, boosting application stability and cutting down runtime errors by 29%.

### Web Developer

#### Zillow

📅 2019 - 2022

📍 Seattle, WA

- Reviewed Gulp-based versioning for static assets, reducing cache miss rates by 33% and elevating page load efficiency.
- Developed a responsive navigation menu using Bootstrap, eleva site navigation and lowering drop-off rates by 14%.
- Ensured cross-browser compatibility for all web applications, leading to a **28% uplift in traffic from diverse browsers**.
- Introduced a single-page application (SPA) using React.js, enhancing user experience and reducing bounce rate by 22%.

### Junior Web Developer

#### Redfin

📅 2017 - 2019

📍 Seattle, WA

- Automated the workflow process through GitHub webhooks, saving approximately 18 hours every month.
- Performed cross-browser testing with Mocha, ensuring consistent performance across major browsers and **minimizing cross-browser issues by 26%**.
- Supported senior developers by debugging complex issues in the codebase, contributing to a 12% downtick in critical bug reports.
- Optimized HTML5 video embedding techniques, providing a smoother playback experience and a 43% cut in video buffering complaints.
