🎂 *27-03-2001*

Career objective

Driven by a passion for Backend development and a desire to expand my expertise, I aim to enhance my Backend programming skills in the short term and broaden my knowledge into **DevSecOps** to contribute to optimizing the company's product development process. My long-term goal is to become a **Senior Developer** within 3 years and progress towards a **Technical Specialist** role in the future.

Skills

- NodeJs (Express)
- Javascript, Typescript, Java, C#
- Database: MongoDb, PostgreSQL, MySQL
- Cloud Platforms: AWS
- Version Control: Git, SVN
- Another: Postman, SonarQube, JMeter, Swagger, Unit Test, Manual Testing

Experiences

FRESHER BACKEND DEVELOPER, NEC Vietnam Co Ltd. *2023 - Present*

- Analyzed and understood business and technical requirements to work with Japanese customers.
- Developed and implemented new web and database programs.
- Implemented manual testing and unit tests.
- Documented APIs with comprehensive descriptions and examples using Swagger.
- Maintained and improved the performance of existing web applications.
- Delivered a successful project with a high rating (3.9/4) from the Japanese client.

INTERN BACKEND DEVELOPER, Viettel High Tech *07/2022 - 10/2022*

- Independently learned Java, reinforcing understanding of syntax, object-oriented principles, and core functionalities.
- Explored MongoDB, understanding its data modeling concepts, document-oriented structure, and query language.
- Adapted to the company's disciplined environment and project development process.

Language

- Toeic LR: 710
- Toeic SW: 260

Education

- **University of Information Technology - UIT** *2023*
  - Engineer in Computer Network & Communication
